Repo and edits: github.com/Vilda007/kytara-harmonicke-postupy — generators `kytara-gen.py` (major), `kytara-gen-moll.py` (minor), `kytara-gen-book.py` (book), `kytara-gen-book-en.py` (EN book).

MIT licence (LICENSE). Diagrams optimized for A4 print; colors = chord functions (green tonic, ochre subdominant, red dominant, blue minor).

Tones, semitones & chord building

The chromatic scale (12 tones) and the major scale

major scale = 7 steps, W = whole step, H = half step

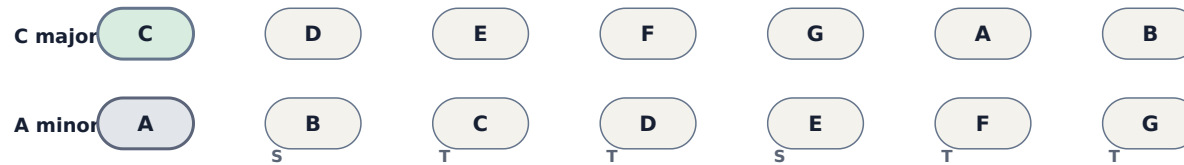

The major scale = whole-whole-half-whole-whole-whole-half (from C: the white piano keys). An octave = 12 semitones = the same tone up.

A key = the same tones transposed anywhere (the pattern holds): G major = one sharp (F#) only, D major = F# + C#, etc.

On the guitar a semitone = one fret; a whole step = two frets. The #/b signs shift a tone by a half step.

Major vs. minor — same tones, different home

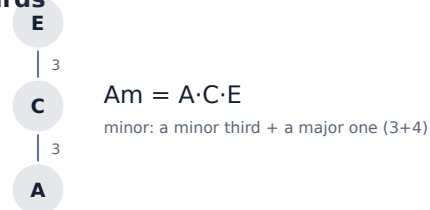

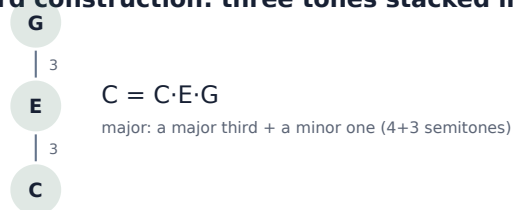

A minor = the RELATIVE MINOR of C major: the same seven tones, but tonic = A. The minor pattern: whole-half-whole-whole-half-whole-whole.

In sound: major = bright/open, minor = darker; the difference is not the tones but where the song calls home.

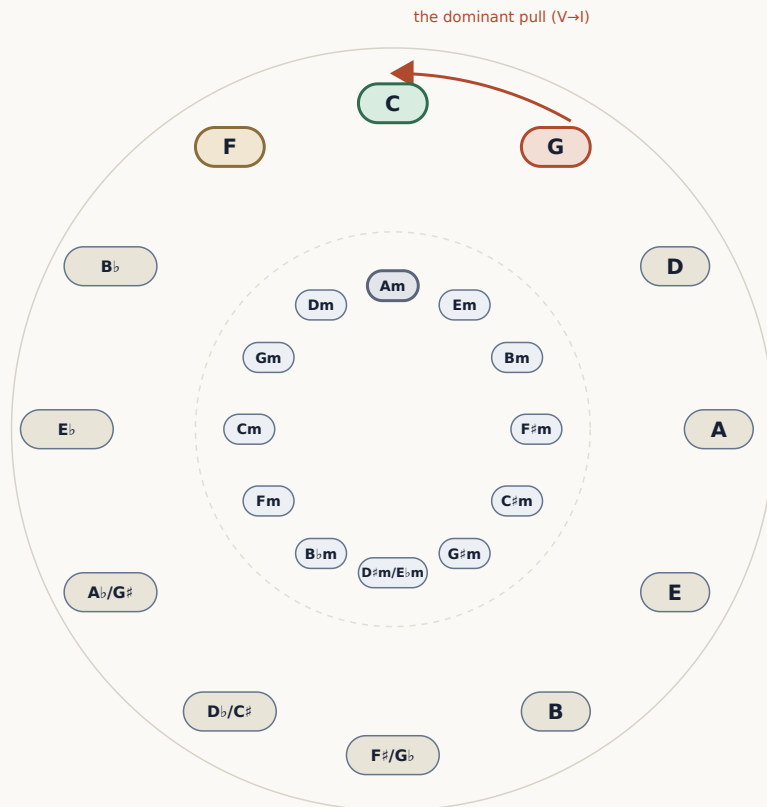

A note on names: Czech tradition says H where we say B natural (Bb = their B). The repo diagrams keep international names (B, Bb).

Chord construction: three tones stacked in thirds

A seventh = add one more third (C7 = C·E·G·Bb) — very common in blues. A chord is named after its lowest tone (its root).

Chord functions & the circle

The C major example: V (G) = the clockwise neighbour, IV (F) on the left, vi (Am) inside the ring — the whole circle works identically for every key.

Why the circle works: clockwise = a fifth (7), counterclockwise = a fourth (5).

Each clockwise step adds one #, counterclockwise drops one b.

Sharps: F# C# G# D# A# E# B# · flats: Bb Eb Ab Db Gb Cb Fb.

Circle of fifths = a map of relations: V = home, IV = look around, vi = sadness, III = escape.

Functions = chord roles inside a key

I	tonic	home, rest — the song rests on it
IV	subdominant	moving away — opens up, a fresh breath
V	dominant	tension — pulls back to the tonic (V→I)
vi	relative minor	a second home — colours the song minor
ii·iii·vii°	a side role	bridges, colors, turnarounds

Cadences — typical pulls (in C major)

V → I	G → C	the firm resolution
IV → I	F → C	the plagal "Amen"
ii - V - I	Dm - G → C	a jazz turnaround

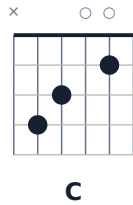

Minor roles (in A minor)

i tonic	the home (Am)
iv + VI	the subdominant (Dm, F)
v minor dominant	soft: Em — it glides, no push
V7, the sharp dominant	E7 = E-G#-B-D: G# = the raised 7th
III, the major sibling	the "escape door" (C)

HARMONIC MINOR = a raised 7th (the 7th degree; A minor: G→G#) — the dominant rises from v (Em) to V7 (E7) and the v→i pull then sounds like a major V→I. Skip ii° (Bdim) on guitar — iv (Dm) fills in fine.

Fretboard practice — diagrams, barre, capo and transposing progressions

How to read the chord diagrams

the thick top line = fret 0 (the nut)

x = don't pluck, ○ = open string

a dot = a fingertip; the columns = strings

E A D G B e (left = lowest → highest)

on barres: the left number = the starting fret

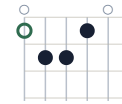

Notes on the guitar: every fret = a semitone. Open strings: E(6th) A(5th) D(4th) G(3rd) B(2nd) e(1st).

A chord = 3-5 strings at once; a muted string (x) just stays dead — the rest ringing is fine.

The diagrams keep international names (B, B^b); Czech players often say H for B natural.

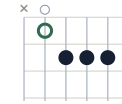

A barre = one finger across all strings → one shape anywhere on the neck.

Barre shapes and the capo

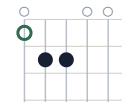

E major

F=1·G=3·A=5·B=7·C=8·D=10
tonic on string 6

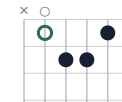

A major

B=2·C=3·D=5·E=7·F=8
tonic on string 5

Em minor

F#m=2·Gm=3·Am=5·Bm=7
tonic on string 6

Am minor

Bm=2·Cm=3·Dm=5·Em=7
tonic on string 5

CAPO = the clamp: it shortens all strings at fret N → easy-key shapes play N semitones up.

Easy major shapes: C · G · D · A · E — easy minor shapes: Am · Em. Everything else = the same shapes + a capo.

Choosing: the nearest easy key = fewer barre frets (e.g. B^b minor: capo 1 + A-minor shapes).

Transposing a progression into any key — step by step

- 1 Pick a progression** e.g. the pop four-chord I-V-vi-IV
- 2 Find the tonic on the circle** your target key (anywhere on the circle)
- 3 Read the neighbourhood** V = clockwise, IV = counterclockwise, vi = the inner chip below the tonic
- 4 Rewrite the chords** the same romans, new names
- 5 Pick shapes or a capo** easy-key open shapes + a capo, or a barre

Example: the four-chord I-V-vi-IV in E major (C → E = shifted 4 semitones): E - B - C[#]m - A; the easy route: capo 4 + C-major shapes.

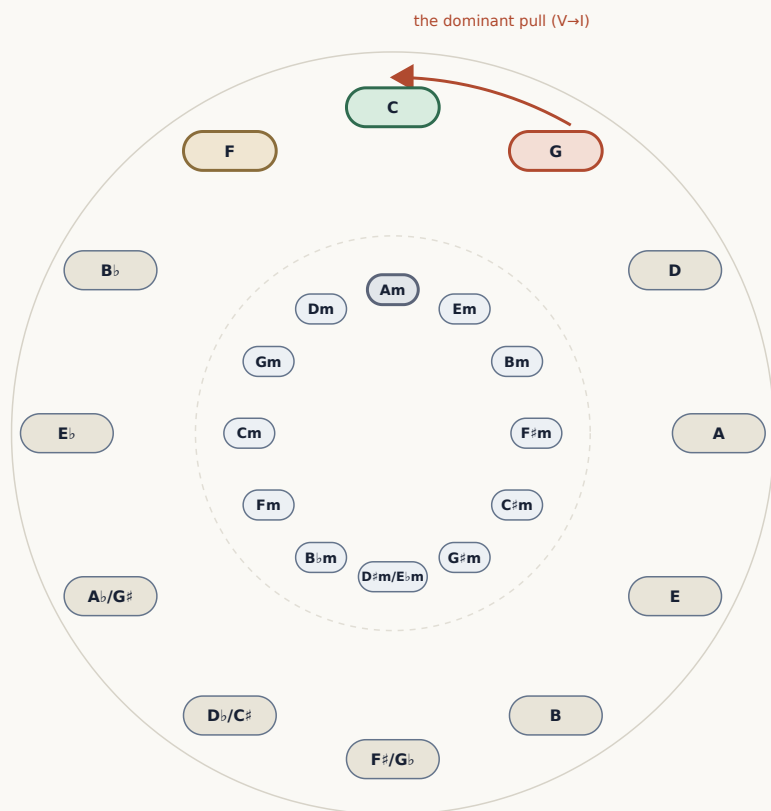

Minor-key tricks: ii° → replace with iv · v → V7 (harmonic minor, raised 7th) · the Andalusian cadence i-VII-VI-V = a minor descent from home.

Blues (12 bars): major: Ix4-IVx2-Ix2-V-IV-I-V · minor: ix4-ivx2-ix2-V7-iv-i-V7 (V7 = the raised 7th).

Play the progressions slowly at 60 BPM and change chords on the beat. Colours in the diagrams = chord functions → your eyes find them fast.

Chord progressions in C major

Circle of fifths · chord functions · proven progressions · barre transposition

Your key = a position on the circle: V (dominant) = the clockwise neighbour, IV (subdominant) on the left, vi (the relative minor) sits in the inner ring below the tonic; the highlighted key is marked by colour.

Diatonic chords in C major

I · C tonic	ii · Dm subdom.	iii · Em linking	IV · F subdom.	V · G dominant	vi · Am rel. minor	vii° · Bdim side
x ○ ○	x x ○	○ ○ ○ ○	○ ○ ○ ○	○ ○ ○	x ○ ○	x ○ ○
C I · tonic	Dm ii · subdom.	Em iii · linking	F IV · subdom.	G V · dominant	Am vi · rel. minor	Bdim vii° · skip it pull substitute: B7 x21202

Notation: ○ = open string, x = don't pluck, dot = a fingertip; the left number = the fret where a barre shape starts.

Proven progressions (in C major)

I - IV - V	C - F - G	the staple of rock and folk
I - V - vi - IV	C - G - Am - F	the pop "four-chord"
vi - IV - I - V	Am - F - C - G	the same four chords, but home in the minor
I - vi - IV - V	C - Am - F - G	do-wop, the 1950s
ii - V - I	Dm - G - C	a jazz turnaround

Blues, 12 bars:

C7	C7	C7	C7	F7	F7	C7	C7	G7	F7	C7	G7
----	----	----	----	----	----	----	----	----	----	----	----

Transposing on the guitar: one barre shape, any key

E major shape
F=1 · G=3 · A=5 · B=7 · C=8 · D=10
tonic on string 6

A major shape
B=2 · C=3 · D=5 · E=7 · F=8
tonic on string 5

Em minor shape
F#m=2 · Gm=3 · Am=5 · Bm=7 · Dm=10
tonic on string 6

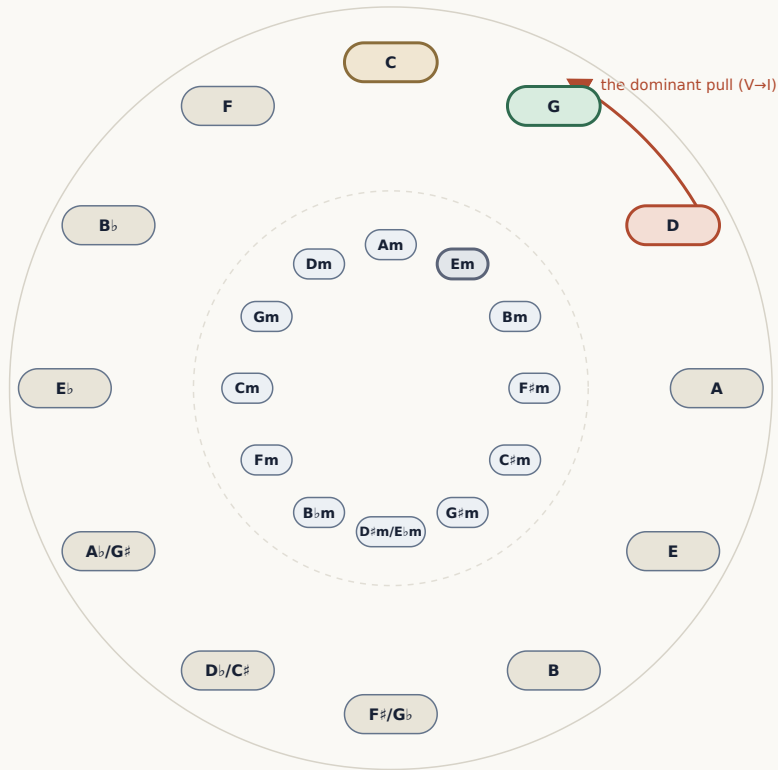

Am minor shape
Bm=2 · Cm=3 · Dm=5 · Em=7 · Fm=8
tonic on string 5

How to read it: a barre = one finger across all strings, at the chosen fret — the shape stays, only the position changes. The green ring marks where the tonic sits (the chord's name). Progressions work in ANY key — you shift them along the circle of fifths: e.g. C-G-Am-F → G major: G-D-Em-C (a 7-fret shift).

Functions: **I tonic** · **IV subdominant** · **V dominant** · **vi rel. minor**
The relations hold in every major key — the notes change, not the roles.

Chord progressions in G major

Circle of fifths · chord functions · proven progressions · barre transposition

Your key = a position on the circle: V (dominant) = the clockwise neighbour, IV (subdominant) on the left, vi (the relative minor) sits in the inner ring below the tonic; the highlighted key is marked by colour.

Diatonic chords in G major

I · G tonic	ii · Am subdom.	iii · Bm linking	IV · C subdom.	V · D dominant	vi · Em rel. minor	vii° · F#dim side
○ ○ ○	× ○ ○	○ ×	× ○ ○	× × ○	○ ○ ○

-----	-----	-----	-----	-----	-----	-----	-----	----	-----	-----	----

Transposing on the guitar: one barre shape, any key

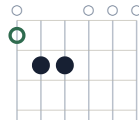

E major shape

F=1 · G=3 · A=5 · B=7 · C=8 · D=10
tonic on string 6

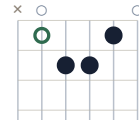

A major shape

B=2 · C=3 · D=5 · E=7 · F=8
tonic on string 5

Em minor shape

F#m=2 · Gm=3 · Am=5 · Bm=7 · Dm=10
tonic on string 6

Am minor shape

Bm=2 · Cm=3 · Dm=5 · Em=7 · Fm=8
tonic on string 5

How to read it: a barre = one finger across all strings,
at the chosen fret — the shape stays, only the position changes.

The green ring marks where the tonic sits (the chord's name).

Progressions work in EVERY minor key — you shift them along the circle:

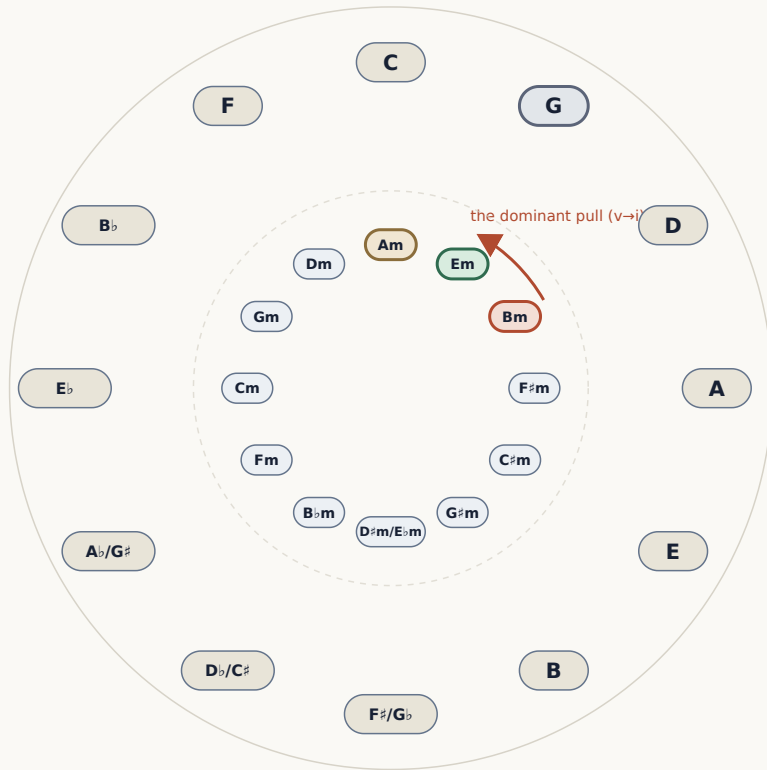

e.g. a-F-C-G (Am-F-C-G) → E minor: Em-C-G-D.

Functions: **i** tonic · **iv**/VI subdominant · **v** dominant

III the major sibling — the notes change, not the roles.

Chord progressions in E minor

Circle of fifths · minor-key chord functions · proven progressions · barre transposition

Your minor key = the inner chip: v (dominant) = the clockwise neighbour, iv (subdominant) on the left, the major sibling (III) sits above the tonic in the outer ring; the key of E minor is highlighted.

Em minor shape

F#m=2 · Gm=3 · Am=5 · Bm=7 · Dm=10
tonic on string 6

Am minor shape

Bm=2 · Cm=3 · Dm=5 · Em=7 · Fm=8
tonic on string 5

The easiest way — the key of D# minor:

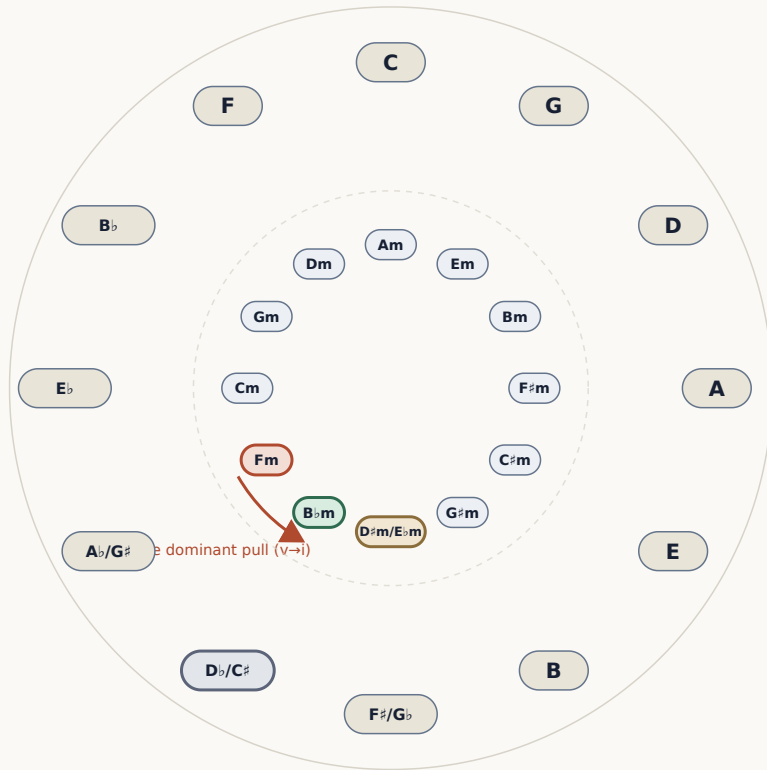

capo 6 + A minor shapes

(Am→D#m, Dm→G#m, Em→A#m, F→B, G→C#, C→F#).

Capo = the clamp: it shifts the easy-key shapes

Chord progressions in B $\flat$ minor

Circle of fifths · minor-key chord functions · proven progressions · barre transposition

Your minor key = the inner chip: v (dominant) = the clockwise neighbour, iv (subdominant) on the left, the major sibling (III) sits above the tonic in the outer ring; the key of B $\flat$ minor is highlighted.

Diatonic chords in B $\flat$ minor

Functions: i · iv/vi · v · III

i · B $\flat$ m tonic	ii $^\circ$ · Cdim side	III · D $\flat$ rel. major	iv · E $\flat$ m subdom.	v · Fm minor dom.	VI · G $\flat$ subdom.	VII · A $\flat$ side
	 Cdim ii $^\circ$ · skip it take iv instead: E $\flat$ m					
B $\flat$ m i · tonic		D $\flat$ III · rel. major	E $\flat$ m iv · subdom.	Fm v · minor dom.	G $\flat$ VI · subdom.	A $\flat$ VII · side

the V7 pull (harmonic minor)
shape: 131211

Notation: ○ = open string, × = don't pluck, dot = a fingertip; the left number = the fret where a barre shape starts.

Proven progressions (in B $\flat$ minor)

i - VI - III - VII

B $\flat$ m - G $\flat$ - D $\flat$ - A $\flat$

the pop four-chord, home in the minor

i - iv - V

B $\flat$ m - E $\flat$ m - F7

the harmonic pull (raised 7th)

i - VII - VI - V

B $\flat$ m - A $\flat$ - G $\flat$ - F

the Andalusian cadence

i - VII - VI - v

B $\flat$ m - A $\flat$ - G $\flat$ - Fm

the softer modal variant

i - III - VII - VI

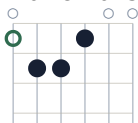

B $\flat$ m - D $\flat$ - A $\flat$ - G $\flat$

the four-chord rotation

Blues in minor, 12 bars:

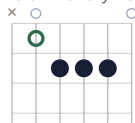

B $\flat$ m7	B $\flat$ m7	B $\flat$ m7	B $\flat$ m7	B $\flat$ m7	B $\flat$ m7	B $\flat$ m7	B $\flat$ m7	F7	B $\flat$ m7	B $\flat$ m7	F7
--------------	--------------	--------------	--------------	--------------	--------------	--------------	--------------	----	--------------	--------------	----

Barre transposition — the shapes hold in every key; the key = the fret where the tonic sits

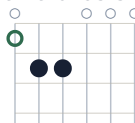

E major shape

F=1 · G=3 · A=5 · B=7 · C=8 · D=10
tonic on string 6

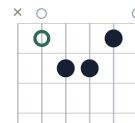

A major shape

B=2 · C=3 · D=5 · E=7 · F=8
tonic on string 5

Em minor shape

F#m=2 · Gm=3 · Am=5 · Bm=7 · Dm=10
tonic on string 6

Am minor shape

Bm=2 · Cm=3 · Dm=5 · Em=7 · Fm=8
tonic on string 5

The easiest way — the key of B $\flat$ minor:

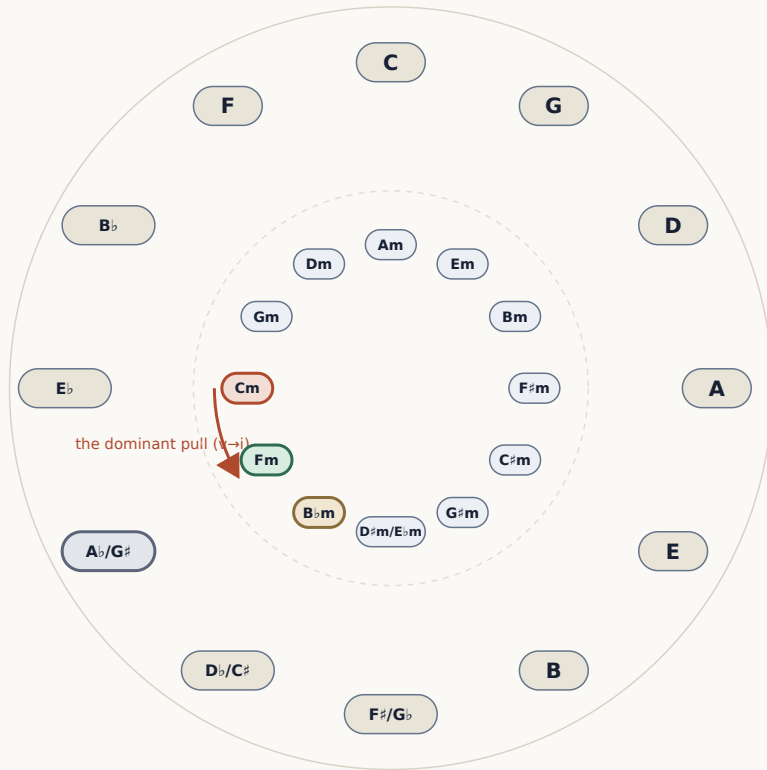

capo 1 + A minor shapes

(Am→B $\flat$ m, Dm→E $\flat$ m, Em→Fm, F→G $\flat$, G→A $\flat$, C→D $\flat$).

Capo = the clamp: it shifts the easy-key shapes

Chord progressions in F minor

Circle of fifths · minor-key chord functions · proven progressions · barre transposition

Your minor key = the inner chip: v (dominant) = the clockwise neighbour, iv (subdominant) on the left, the major sibling (III) sits above the tonic in the outer ring; the key of F minor is highlighted.

Diatonic chords in F minor

Functions: i · iv/vi · v · III

i · Fm tonic	ii° · Gdim side	III · Ab rel. major	iv · Bbm subdom.	v · Cm minor dom.	VI · Db subdom.	VII · Eb side
Fm i · tonic	Gdim ii° · skip it take iv instead: Bbm	Ab III · rel. major	Bbm iv · subdom.	Cm v · minor dom.	Db VI · subdom.	Eb VII · side

the V7 pull (harmonic minor)
shape: x32310

Notation: ○ = open string, × = don't pluck, dot = a fingertip; the left number = the fret where a barre shape starts.

Proven progressions (in F minor)

i - VI - III - VII

Fm - Db - Ab - Eb

the pop four-chord, home in the minor

i - iv - V

Fm - Bbm - Cm

the harmonic pull (raised 7th)

i - VII - VI - V

A7
the V7 pull (harmonic minor)
shape: x02020

Notation: ○ = open string, x = don't pluck, dot = a fingertip; the left number = the fret where a barre shape starts.

Proven progressions (in D minor)

i - VI - III - VII

Dm - Bb - F - C

the pop four-chord, home in the minor

i - iv - V

Dm - G - A7

the harmonic pull (raised 7th)

i - VII - VI - V

Dm - C - Bb - A

the Andalusian cadence

i - VII - VI - v

Dm - C - Bb - Am

the softer modal variant

i - III - VII - VI

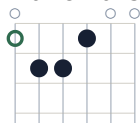

Dm - F - C - Bb

the four-chord rotation

Blues in minor, 12 bars:

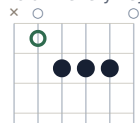

Dm7 Dm7 Dm7 Dm7 Dm7 Dm7 Dm7 Dm7 A7 Dm7 Dm7 A7

Barre transposition — the shapes hold in every key; the key = the fret where the tonic sits

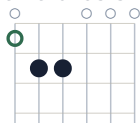

E major shape

F=1 · G=3 · A=5 · B=7 · C=8 · D=10
tonic on string 6

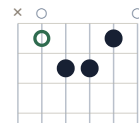

A major shape

B=2 · C=3 · D=5 · E=7 · F=8
tonic on string 5

Em minor shape

F#m=2 · Gm=3 · Am=5 · Bm=7 · Dm=10
tonic on string 6

Am minor shape

Bm=2 · Cm=3 · Dm=5 · Em=7 · Fm=8
tonic on string 5

The easiest way — the key of D minor:

No capo — Dm/F/G/Am/Bb/C mostly open shapes; otherwise capo 5 + A-minor shapes (Am→Dm)

Capo = the clamp: it shifts the easy-key shapes
